PROFILE SUMMARY

- Targeting software engineering roles with an organization of high repute with a scope of improving knowledge and further career growth, I am enthusiastic about collaborating with diverse teams to tackle challenging projects.

- Committed to staying updated with the latest industry trends and technologies, continuously enhancing skills to provide innovative solutions.

EXPERIENCE

FLIGHT API, Jaipur Rajasthan MAY 2025- PRESENT Front End Developer intern
- Working onAPI development and integration for flight data services.
- Designed user-friendly interfaces that enabled seamless flight searches and bookings, resulting in improved user satisfaction.
- Managed databases using Multiple Databases system, ensuring optimized data queries and performance. • Effectively handled API data, including parsing, formatting, and displaying flight information.

COLLABERA, Vadodara Gujarat   MAR 2025 – APR 2025   Associate Talent Specialist
- During my internship at Collabera, I worked with a range of modern recruitment tools and platforms that are essential in the field of international talent acquisition. These tools enabled me to identify, screen, and connect with qualified candidates across various industries.
- I was responsible for sourcing and screening potential candidates for international job roles, primarily focused on clients based in the USA and Canada.
- My responsibilities included creating Boolean keystrings, filtering profiles based on skills and geography and contacting suitable candidates to introduce them to job roles that fit their experience and expertise. Using professional platforms like METal, Monster, and CareerBuilder,
- Work closely with hiring managers to understand the finalized compensation package, including base salary, bonuses, benefits, and other perks.
